Executive Summary

I am interested in the processes by which people communicate, deliberate, and collaborate persuasively with each other to work toward social change. Broadly, my research seeks to establish more civil and productive democratic deliberation within our culture. More narrowly, I am particularly interested in how the world of sports (and our society's incessant "talk" about sports) shapes, reinforces, and challenges our shared values – and, in turn, our cultural notions of social justice, identity, and intersectionality.
